The main image shows a large, multi-tiered LEGO castle built on a green baseplate. The castle has grey stone walls, brown wooden ladders, and blue flags. A minifigure with a green hat and bow is on a high platform, while another minifigure with a sword is on a lower level. The background is a painted backdrop of a forest with green trees and a sunset sky. In the bottom right, two minifigures are shown with a treasure chest. Three inset images show different scenes: a battle scene with skeletons, two minifigures with shields, and a minifigure with a sword.

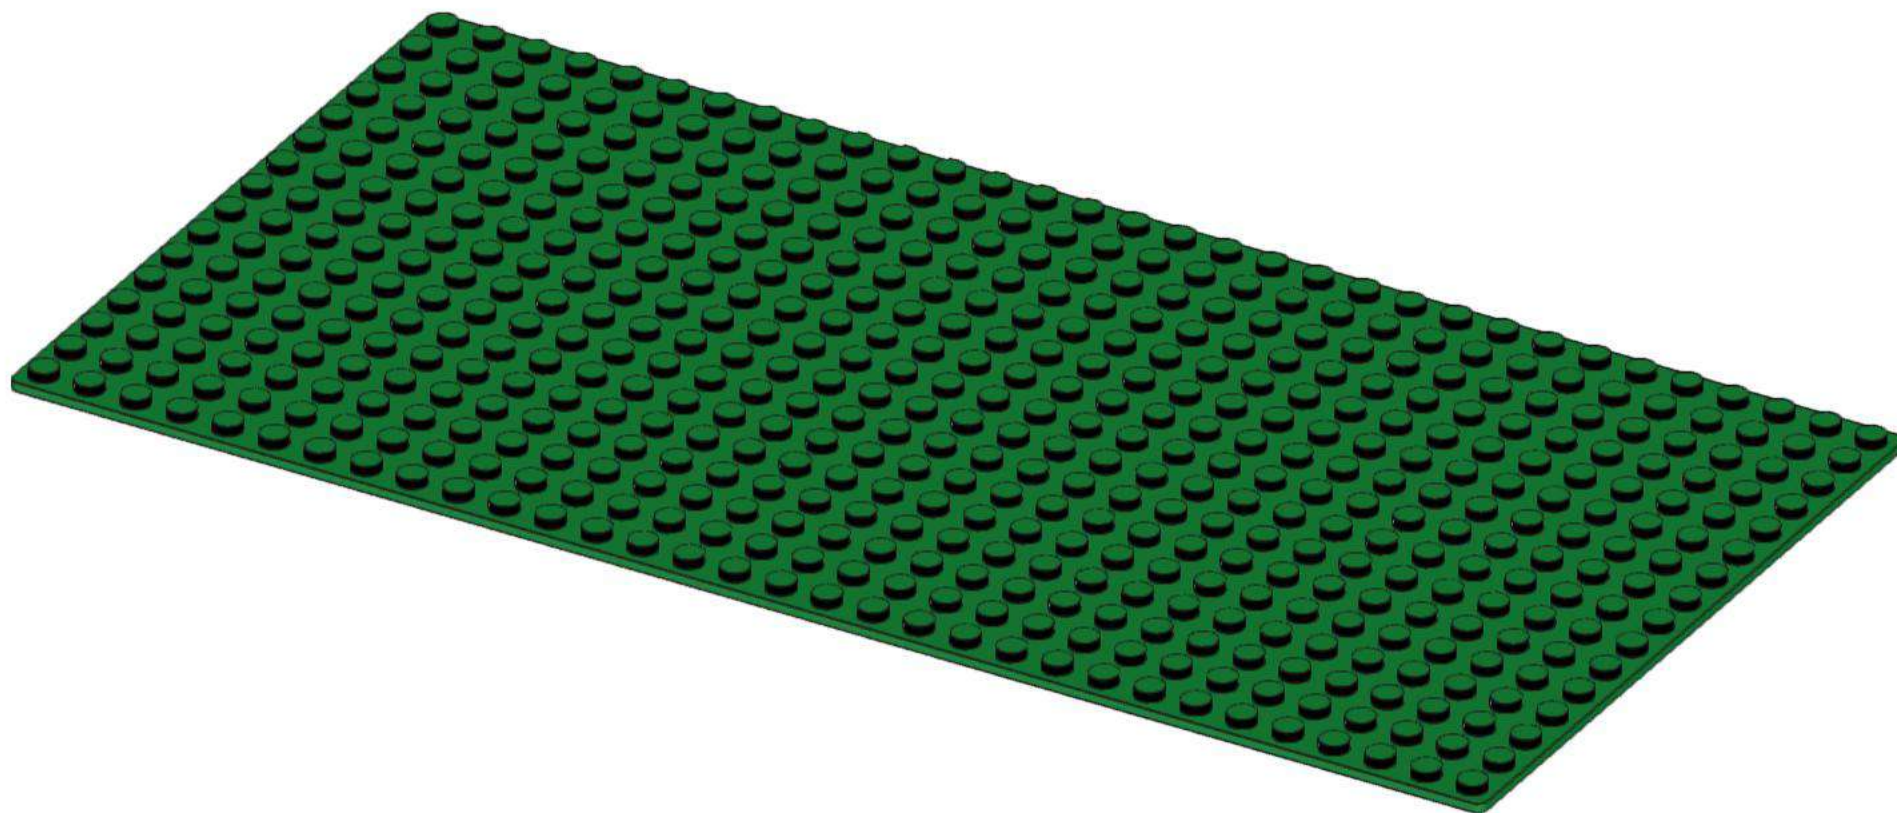

Brian's Stronghold

6046 Back of the Box build

I recreated the rest as good as I could based on the images. However, I feel like the original designers would have added furniture.

This step is optional.
