Construction tip

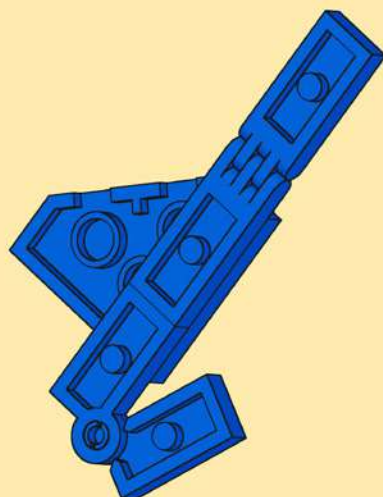

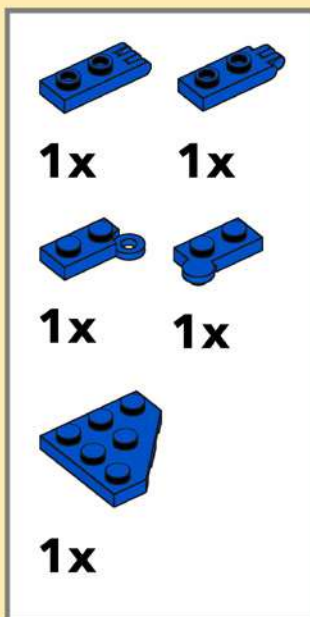

Temporarily remove the rear hinge plate for easy assembly.

39

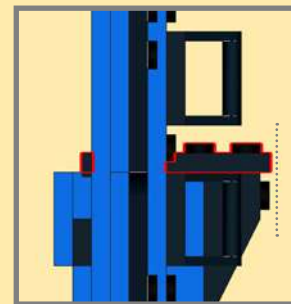

40

Double check

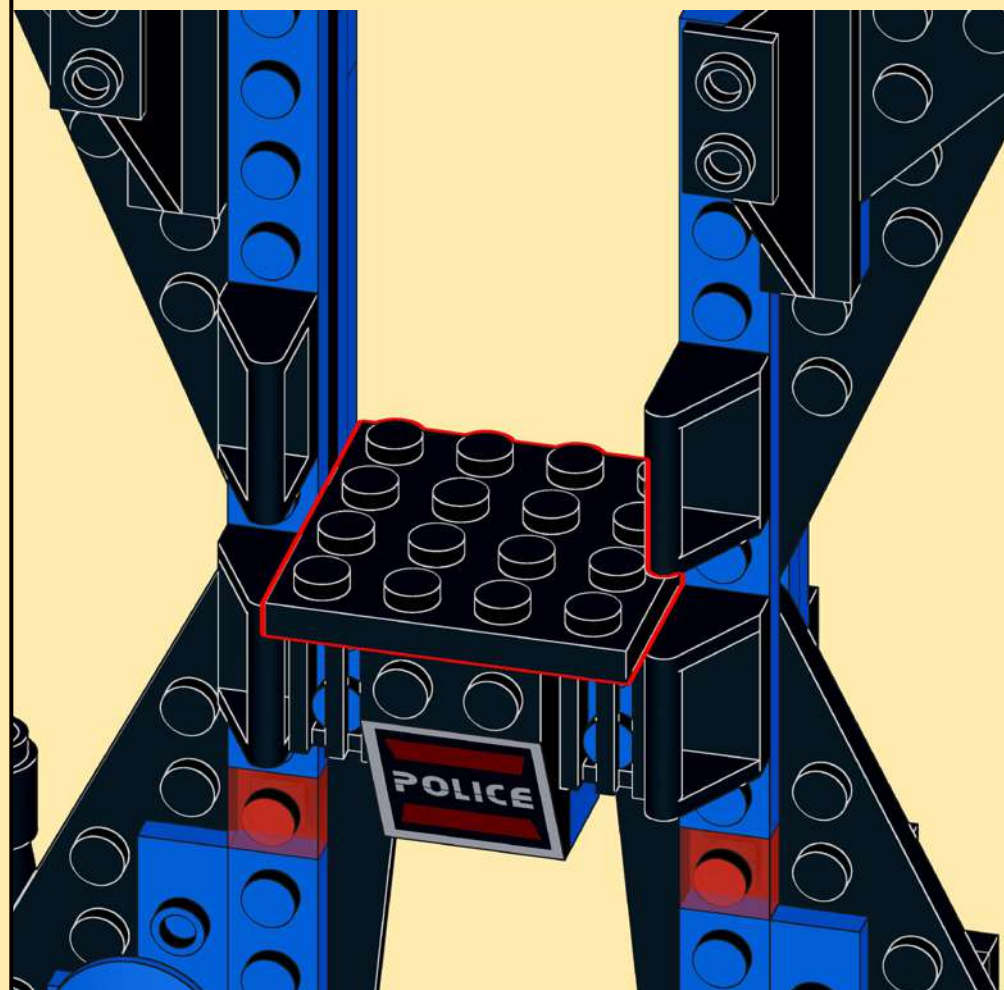

Move all four black top hinge parts to the depicted position.

41

Important

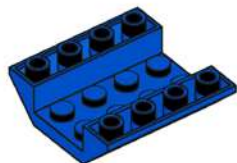

The plate rests evenly on top, whilst the front side the plate should be flush with the top studs of the decorated slope.

49

Note

These two black 2×3 plates should sit flush atop of the trans-red panels and hinge bricks.

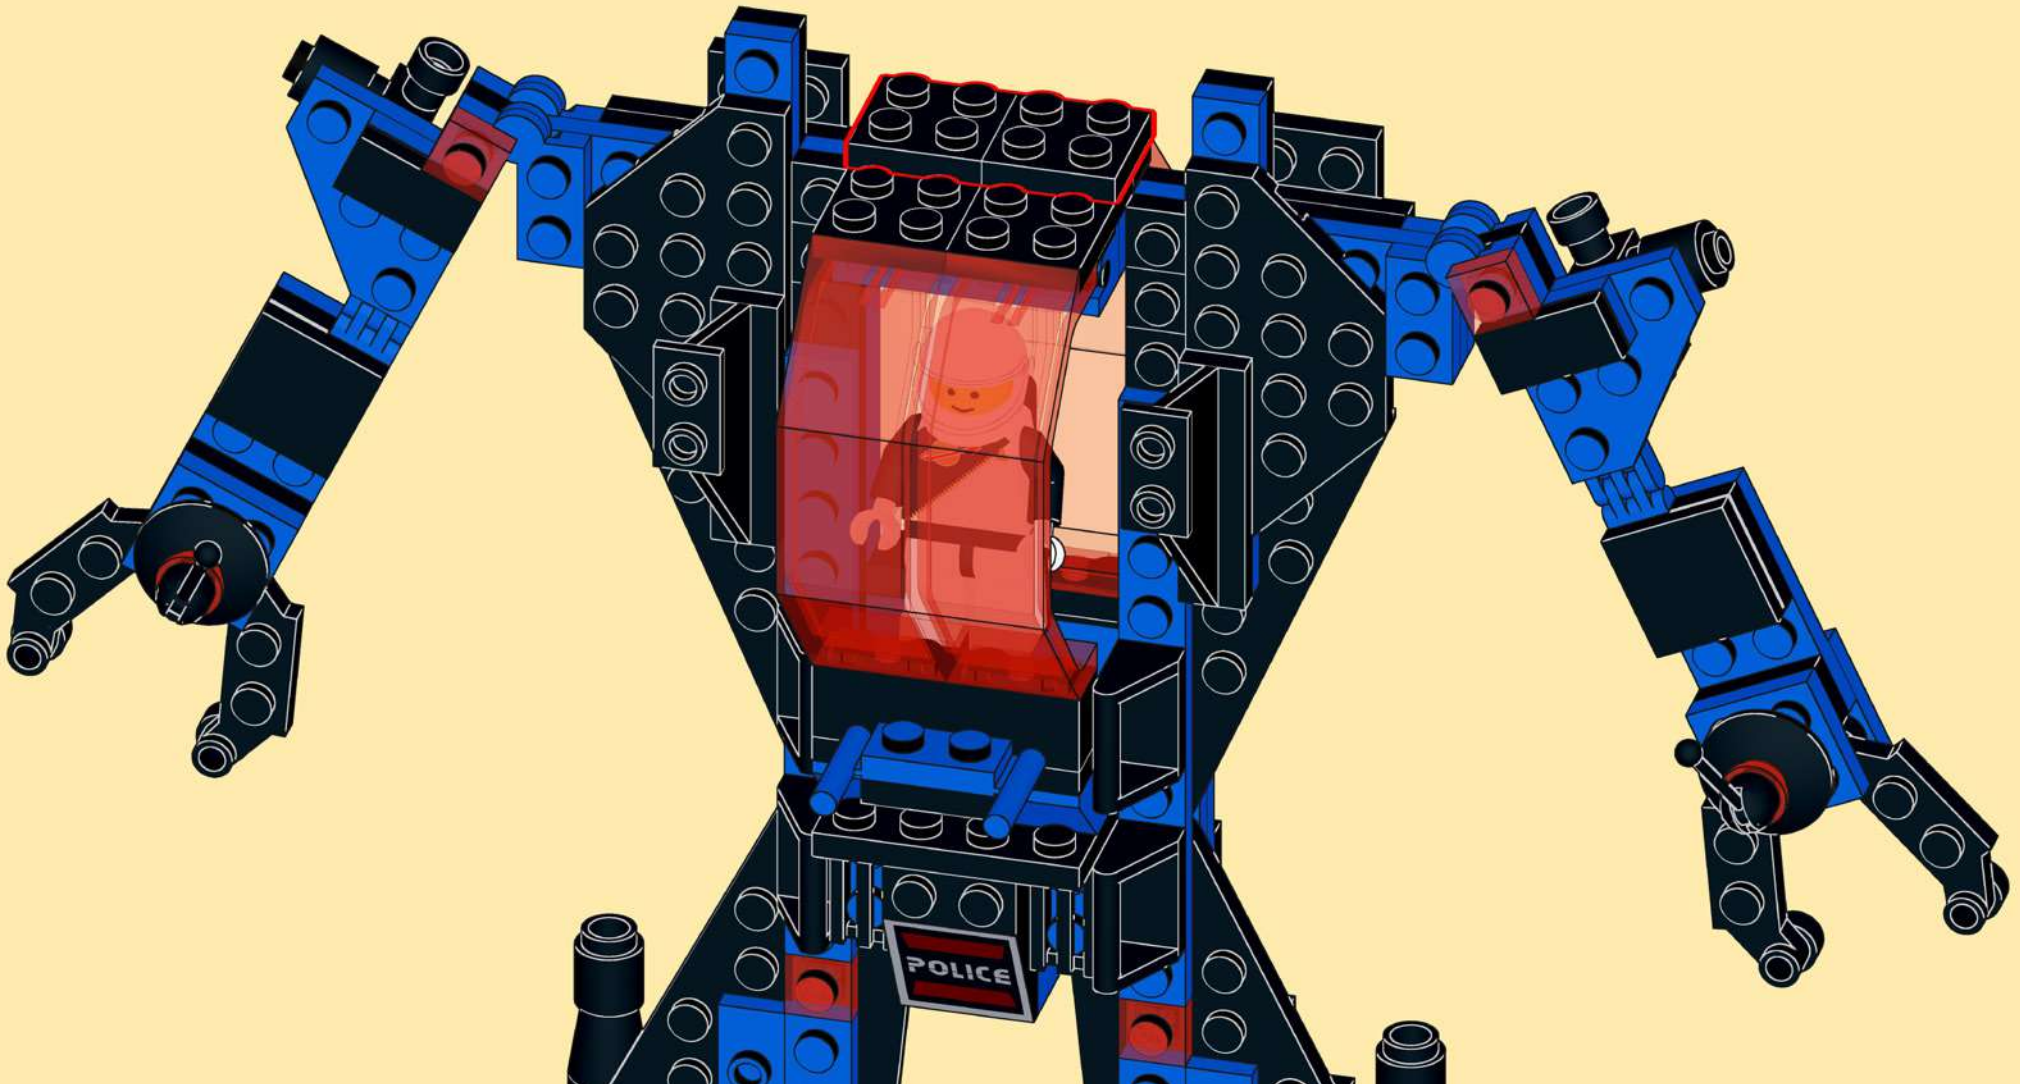

50

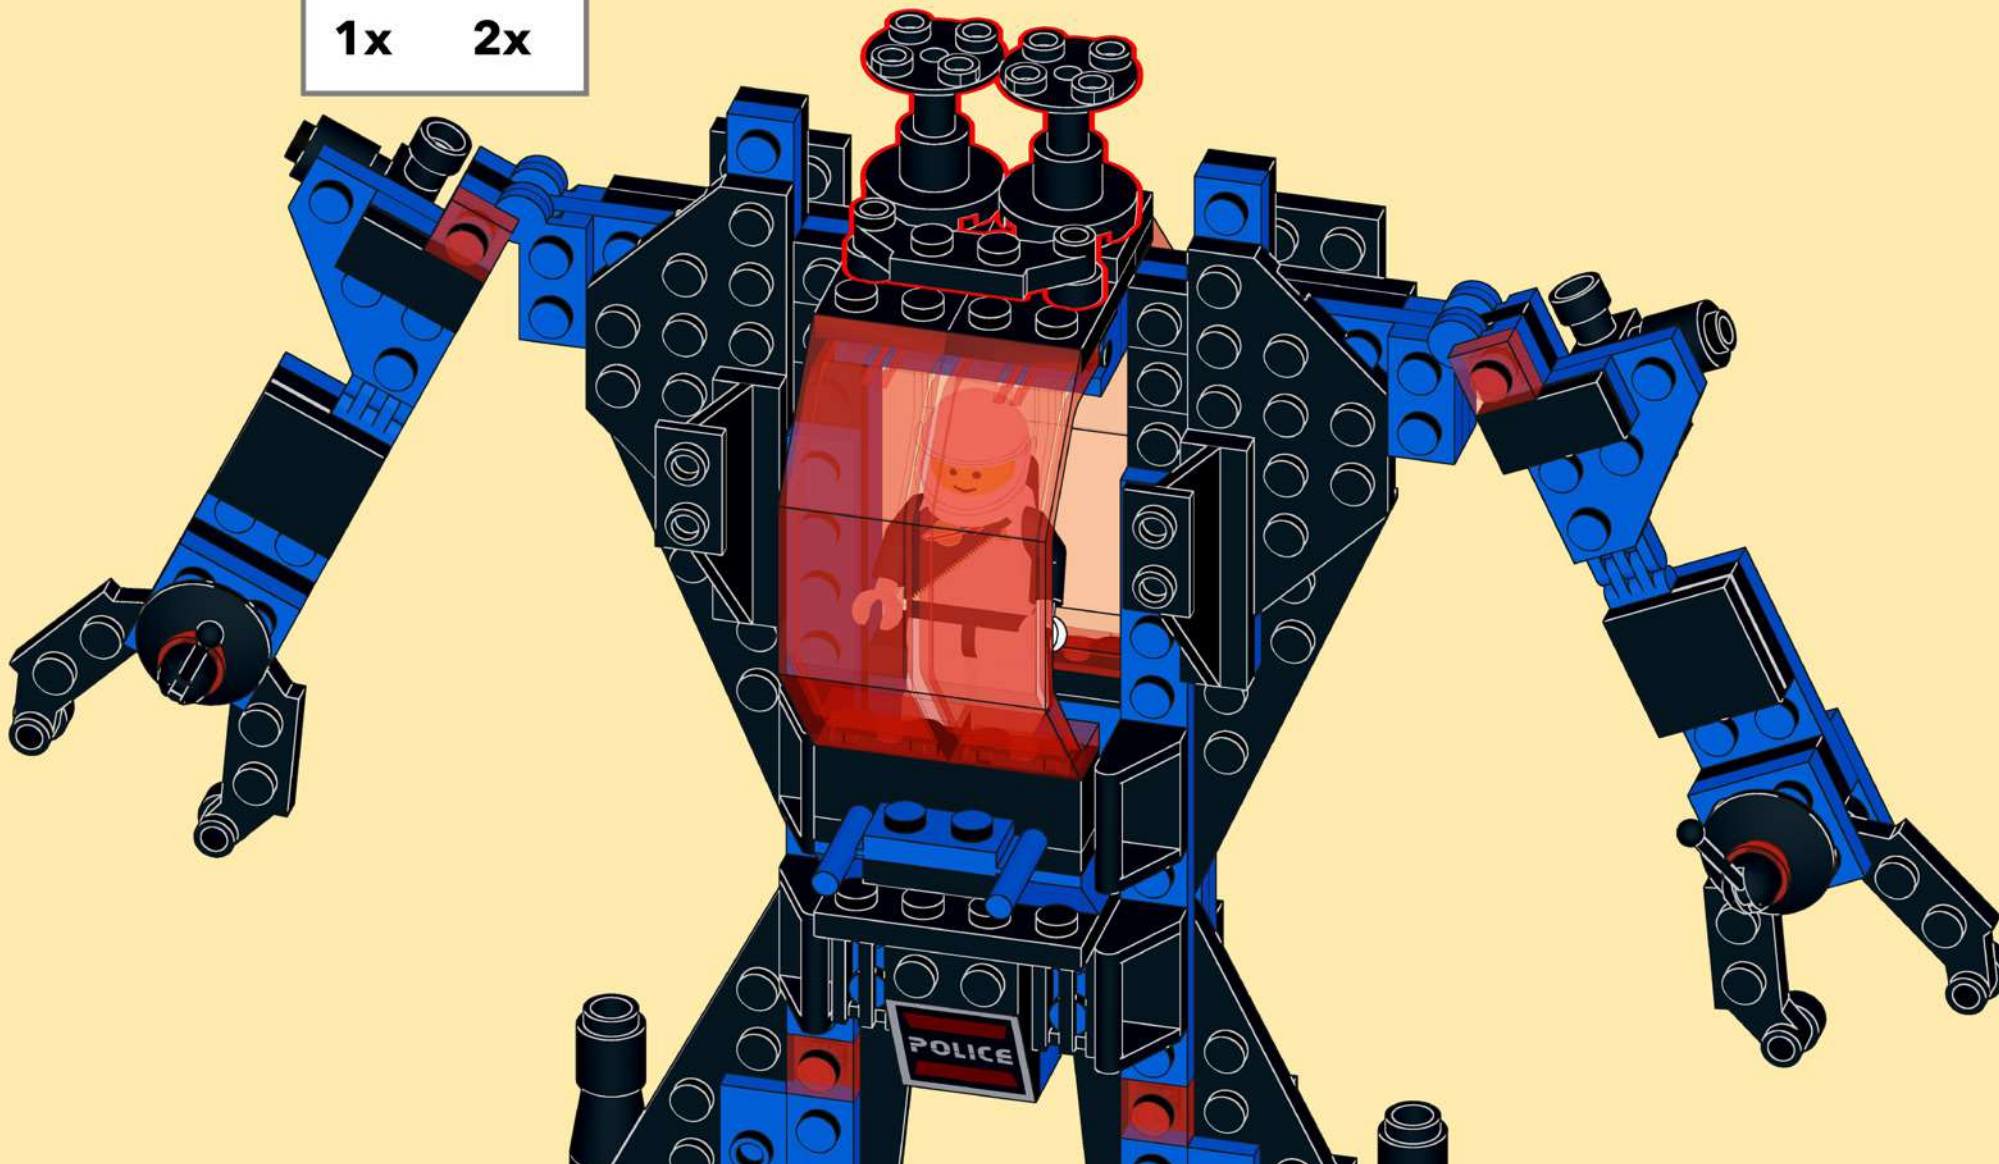

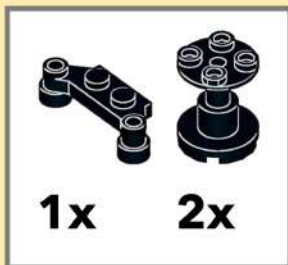

Stability tip

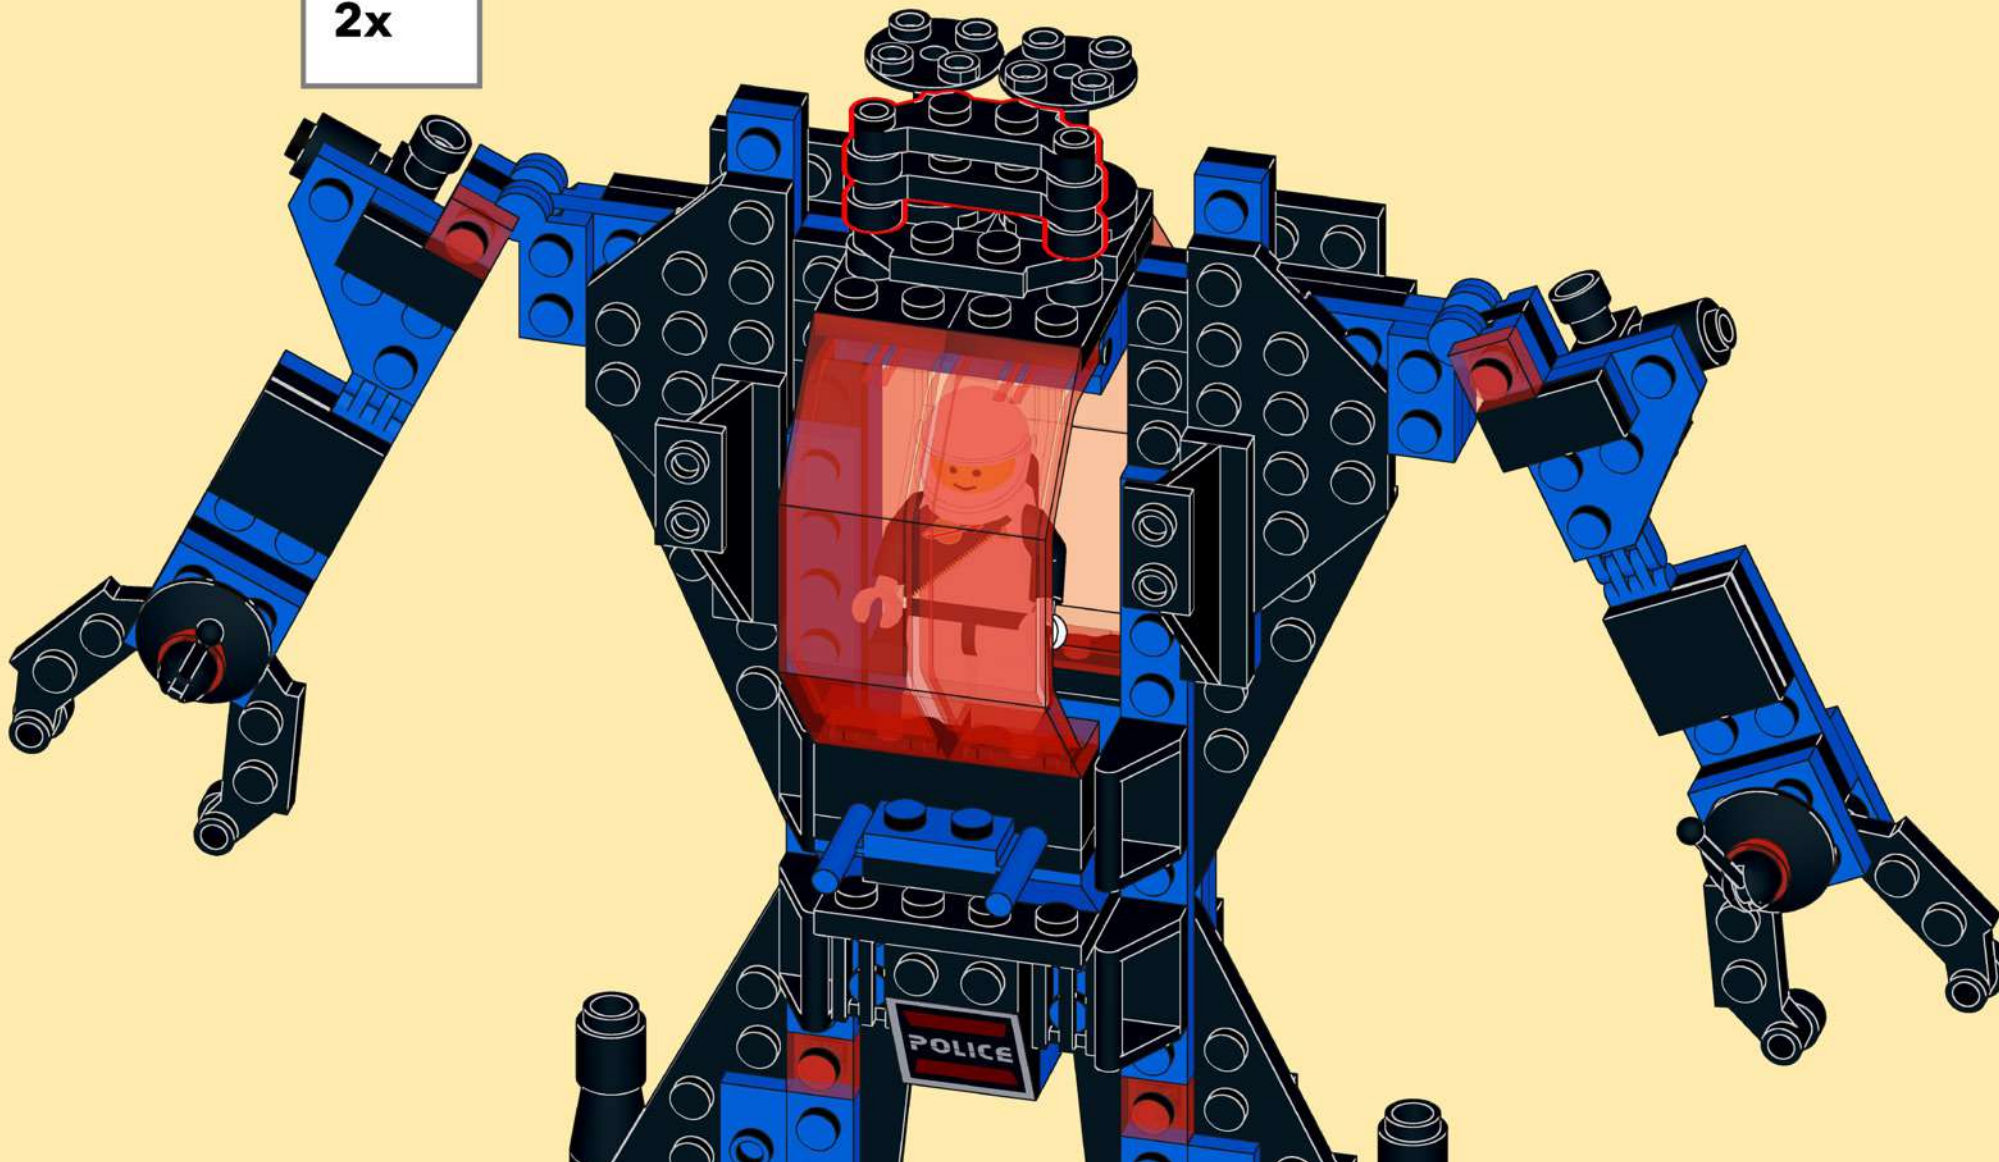

For stability a remaining 2×4 blue plate can be used instead of these two black 2×2 plates.

Done!

Note the alignment of the somewhat fragile construction of neck and head to ensure the exactness of the replica.
